

Medical devices of all types are now routinely being supplied with Wi-Fi connectivity or a Lan port as standard. Clearly, technology has an ever increasing part to play in making these devices ever more efficient, effective and safer in the treatment of patients. However, it is also evident that there are security risks associated with malicious interference in their operation, the integrity of the data that they produce and consequential risk to other IT systems on the network.

These event will give insight into:

- How connected medical devices and the systems they are connected to can be protected from attack.
- How connected medical devices and the systems they are connected to can be protected from in house misuse.
- How to safely transfer patient data from medical devices using Patient Data Management Systems or to a Central Monitoring System.
- The importance of increased inter-agency working between suppliers, clinical engineers, IT departments and end users in order to understand and manage risks.
- New technological developments.
- ISO 80001-1 and what it means.
- MHRA guidance.
- Network Inventory Vulnerability – do you know what is connected to your network?
- Changing staff behaviour.

**NAMDET Members can attend either the North event in Leeds (21/2/18) or the South event in Westminster (1/3/18) for a greatly reduced price of just £50+vat**

These conferences are full day events taking place in the North and South on Wednesday 21<sup>st</sup> February in Leeds and on Thursday 1<sup>st</sup> March in London. The conferences will consist of presentations from expert speakers and opportunities to network with your peers and suppliers in the allied exhibition area. A buffet lunch and refreshments will be provided throughout the day.

**Speakers include:**

**Paul T Lee,**

Chairman of NAMDET and  
Medical Device Training Manager,  
ABM University Health Board

**Patrick Maw,**

Consultant Clinical Scientist,  
UCLH

**Professor Harold Thimbleby,**

Expert adviser to the Health  
Informatics Unit at  
Royal College of Physicians

**Dr Munish Jokhani,**

Clinical Engagement Lead,  
NHS Digital

**To Book your place for the reduced NAMDET member  
rate just call:**

**Georgia Richardson on 0161 482 7850**

**or email your details to**
