 STATE OF CARE

State of Care
October 2017

 #stateofcare

Unique oversight of health and care

- **Full picture** of the quality of health and social care in England, with ratings for all sectors
- Now have a **baseline** from which to draw conclusions about quality and safety of care and what influences this

- 21,256 adult social care services
- 152 NHS acute hospital trusts
- 197 independent acute hospitals
- 18 NHS community health trusts
- 54 NHS mental health trusts
- 226 independent mental health locations
- 10 NHS ambulance trusts
- 7,028 primary medical care services

- Is it safe?
- Is it effective?
- Is it caring?
- Is it responsive?
- Is it well-led?

- Increasingly, CQC will report on **quality of areas** and coordination across services – for care fit for the 21st century

Congratulations to staff

- Results are a credit to frontline staff, managers and leaders

Health and care services are at full stretch – which impacts upon people

Increased complexity of demand = new challenges

Providers must change to meet complexity and challenges

Future quality of care is precarious

- Providers struggling to cope with more complex demand
- People waiting over four hours at A&E
- More planned operations cancelled and people waiting longer
- Increasing demand for mental health services, affecting waiting time
- Fewer nursing home beds
- Adult social care providers handing back contracts
- One in eight older people are not receiving help they need

The quality of care across England is mostly good

Much is encouraging – despite challenging circumstances, most people are still getting high quality care

Improvement

- Common factors leading to improvement:
 - Patient-centred care
 - Strong leadership
 - Positive culture
 - Shared vision
 - Outward looking approach
 - Involving people, communities, partners and collaborating

Of those services originally rated inadequate, most have improved

Hospitals	GP practices	Mental Health	Adult social care
80%	80%	100%	82%

Detailed sector findings

- How should the system improve?
- First, some findings from the sectors

Primary medical services

- GP quality is good – 89% good and 4% outstanding – 52 million people
- High-performing GP practices collaborating and using non-traditional roles to support and reduce referrals
- Safety is main concern for GPs - poor risk management, learning from incidents and poor leadership
- Rising demand not matched by workforce growth in general practice
- 61% of urgent care and out-of-hours rated good and 8% outstanding
- Online services improving people's access to care – initial concerns around safety and safeguarding have improved on re-inspection
- Improved access needed to speech and language, occupational therapies and diagnostics for children with autism

Adult social care

- 78% rated good, but 19% rated requires improvement and 1% (303 locations) inadequate
- Caring rated best – 92% good and 3% outstanding. Safe and well-led poorest – 22% requires improvement and 2% inadequate
- High-performing services have strong leaders – innovative registered managers known to staff, people using the service, carers and families had a positive impact
- High-quality services are person-centred – staff get to know people as people, understanding their interests, likes and dislikes
- Most enforcement for poor care relates to governance, safety, staffing and person-centred care
- *Quality matters* joint commitment developed

Mental health

- 68% of NHS core services good and 6% outstanding. In independent services, 72% good and 3% outstanding
- About one quarter of NHS and independent services rated requires improvement, 1% of NHS and 2% of independent inadequate
- Numbers in 'locked rehabilitation wards' too high – often long stay wards that institutionalise patients, rather than a step back to independent life
- Wide variation in use of physical restraint for challenging behaviour. Low levels = staff trained to anticipate and de-escalate behaviours
- Some patients in dormitories with strangers or mixed sex wards.

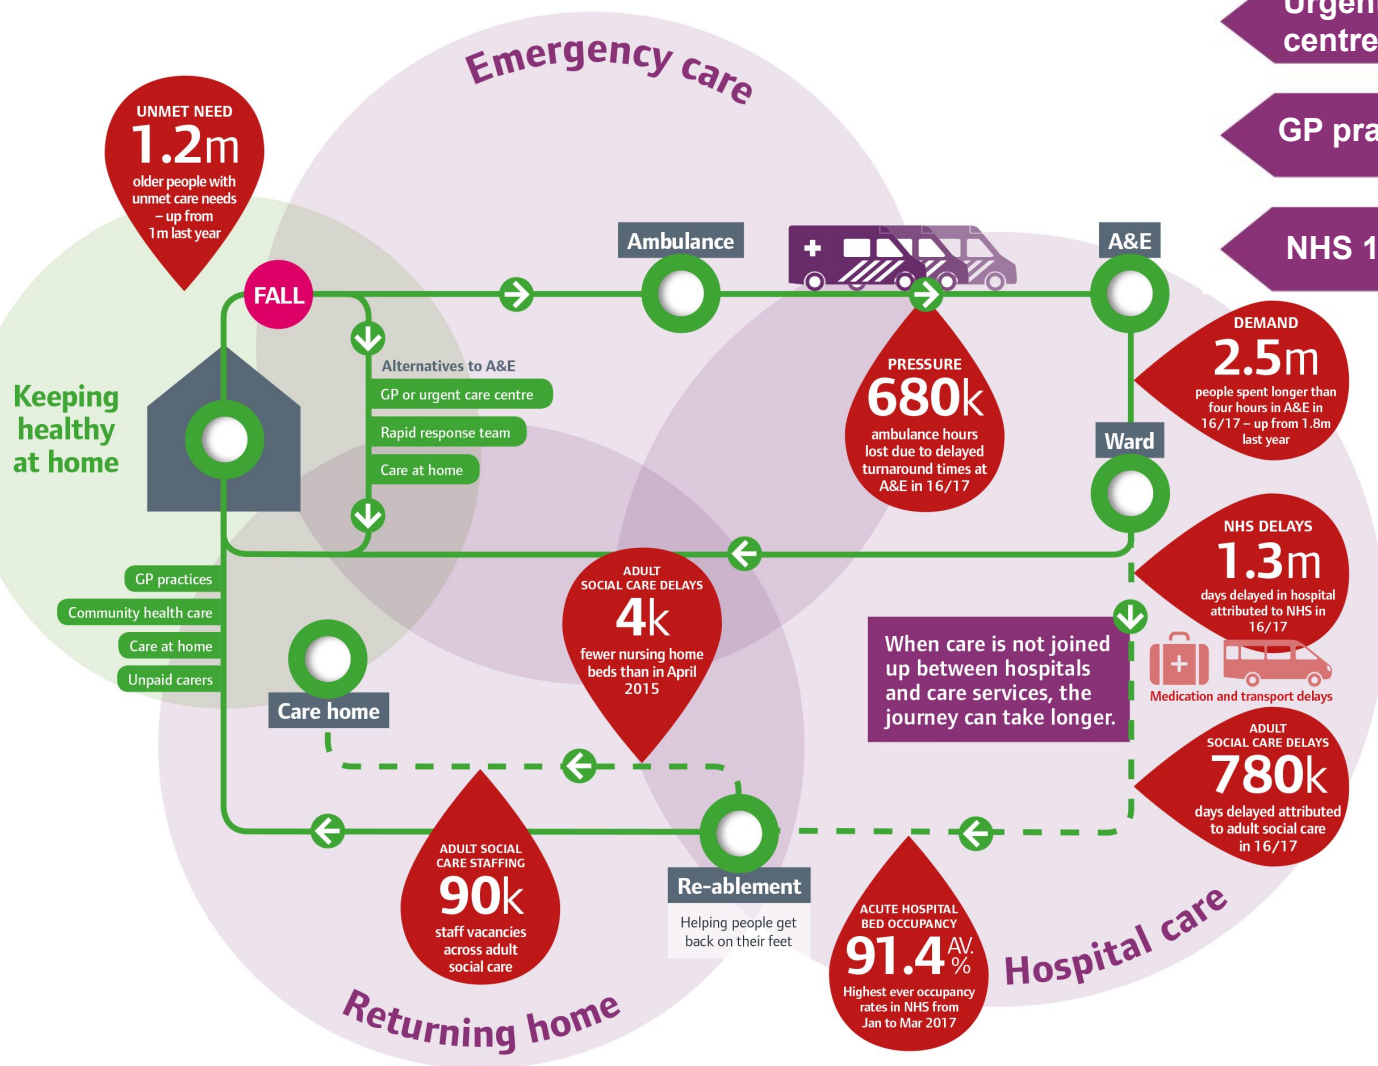

NHS hospitals

- 55% acute hospitals core services rated good and 6% outstanding - 51% and 5% last year
- Most community health services good (66%) or outstanding (6%). Of 10 ambulance trusts, 3 good and one outstanding
- Pockets of poor care exist, even in services rated good. Large variation in quality – within hospitals and between hospitals in a trust
- In NHS acute hospitals core services, safety remains a concern but improving – 5% inadequate vs 6% last year
- Too much reliance on agency staff, and emergency departments with not enough medical staff
- Good leadership at all levels, with strong staff engagement and a positive organisational culture drives improvement and quality care

What happens if I have a fall?

- Urgent care centre? → A&E?
- GP practice? → Care home?
- NHS 111? → Re-ablement?

I am 78
I have hip and knee problems
Sometimes I have difficulty remembering
I live alone and I want to stay independent

Local collaboration and joined-up care

Complexity + challenges = collaboration

Golden thread connecting vision to delivery

- Putting people first
- Shared vision and strong leadership
- All staff to share that vision and deliver to action
- Work together as part of a system

Medical Devices findings

Positive findings were most common within:

- Suitability of available medical devices - 81% reported that a sufficient quantity of equipment was available on wards to ensure the delivery of safe care that meets patients' needs
- Access to medical devices - 87% reported medical devices as suitably stored and easy to access
- Medical device maintenance - 82% reported that robust processes for the servicing and maintaining of medical devices were in place and routinely monitored in line with trust policy and/or manufactures guidelines

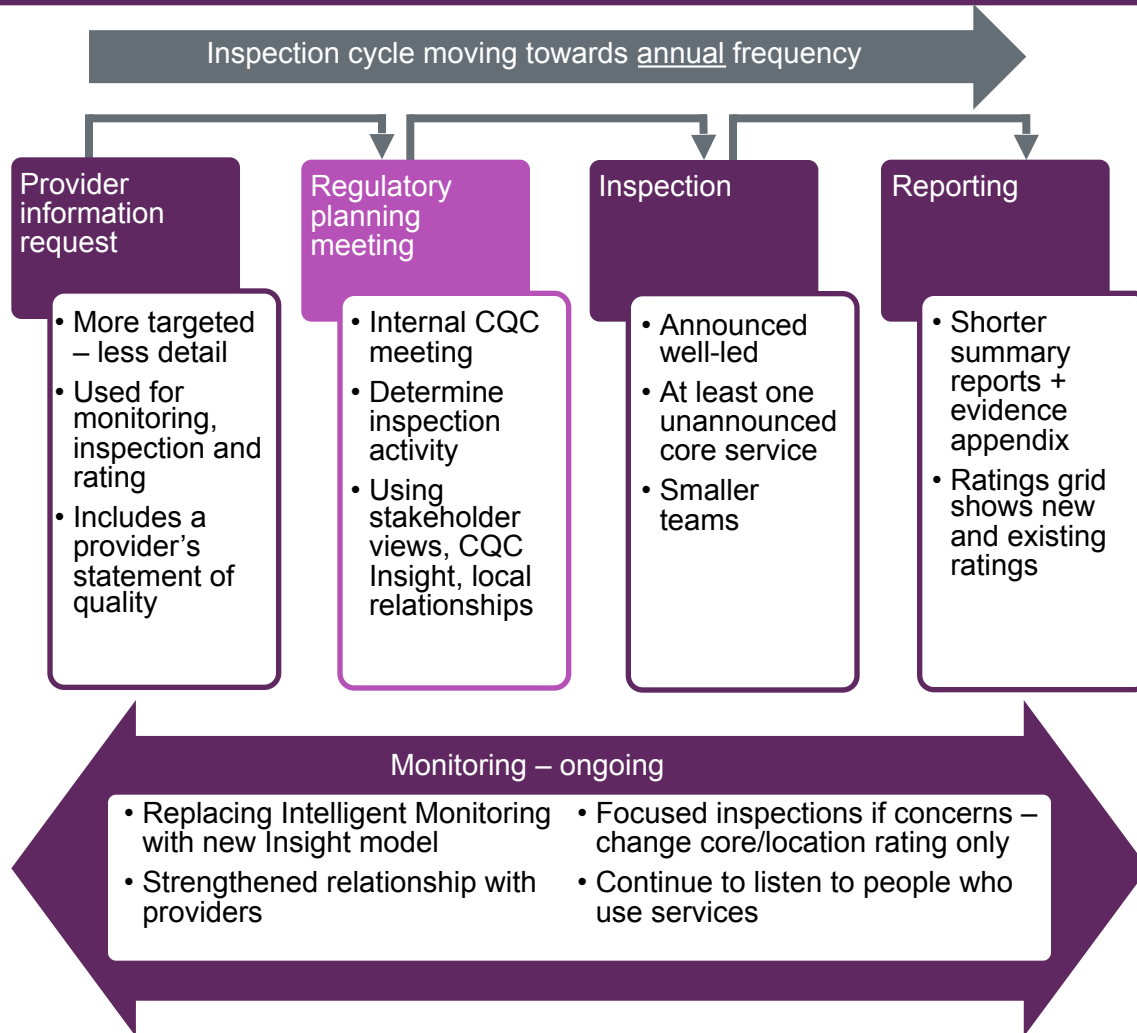

However,

- 25% reported inconsistencies with the regular checking of equipment
 - 31% reported that medical devices/equipment available on resus trolleys for emergency care was not checked daily (in line with trust policy), creating a risk to patient safety
-

Introduction to CQC 'Next phase' methodology and well-led assessment

Hospitals next phase approach for NHS trusts

The well-led framework: Key Lines of Enquiry

<p>Is there the leadership capacity and capability to deliver high-quality, sustainable care?</p>	<p>Is there a clear vision and credible strategy to deliver high-quality sustainable care to people, and robust plans to deliver?</p>	<p>Is there a culture of high-quality, sustainable care?</p>
<p>Are there clear responsibilities, roles and systems of accountability to support good governance and management?</p>	<p>Are services well-led?</p>	<p>Are there clear and effective processes for managing risks, issues and performance?</p>
<p>Is appropriate and accurate information being effectively processed, challenged and acted on?</p>	<p>Are the people who use services, the public, staff and external partners engaged and involved to ensure high-quality sustainable services?</p>	<p>Are there robust systems and processes for learning, continuous improvement and innovation?</p>
