Training in a Virtual World

11TH NOVEMBER 2021

9 AM TO 3 PM

INVITED SPEAKERS INCLUDE; MHRA, NHSE & NHSI, HSIB AND HEALTHCARE, PRESENTATIONS ALSO ON TRAINING AND HUMAN FACTORS.

Despite the enormous pressure in 2020 we have managed to get a great group together to present on 11th November 2021 as the National NAMDET conference. Our speakers are from MHRA, NHSI, NAMDET and of course members and industry partners.

Our theme this year is all around 'Training in the Virtual World' and focuses on training course design, training during COVID, human factors too. NAMDET regions will be joining in the virtual event (9am - 3pm) and then regions across the UK will be managing their own face-to-face meetings (if allowed) as a follow on for the rest of the day.

Our colleagues at Olympus are helping NAMDET by hosting the conference in their 'Virtual Hub'. If you wish to check out the Olympus Education Portal, please follow the link by [selecting here](#) for access to education and training resources.

In 2022, we plan to all be back and have booked the conference centre at York for our first major face to face event.

NAMDET will also be producing a joint MDET journal and Conference programme for 2021 and offering advertorial and sponsorship opportunities.
